

STATE OF RHODE ISLAND OFFICE OF ENERGY RESOURCES

Your one-stop-shop for clean energy project funding and support

Lead by Example Program Overview

There are several programs available for State agencies, municipalities, schools and quasi-public agencies to reduce their energy consumption costs, improve building comfort and lower their carbon emissions via the Governor's Lead by Example initiative.

PROJECT SUPPORT

Energy efficiency projects — Develop energy efficient retrofits and above-code new construction projects for deep energy savings.

Renewable energy installations — Stabilize energy costs and shrink your carbon footprint by considering renewable energy for your facility.

Clean transportation — Equip your facility with charging stations for electric vehicles.

DATA MANAGEMENT

Energy data management — Take control of your energy usage and costs by tracking your data all in one online portal.

Demand response — Take advantage of extra energy savings when you participate in special peak energy reduction events.

TRAINING AND RECOGNITION

Training — Arm your staff with best practices to improve facility management and identify new cost-savings opportunities.

Lead by Example Clean Energy Awards — Enter your clean energy project into OER's annual awards program to recognize your team and showcase your progress.

PROCUREMENT STRATEGY

Purchasing mechanisms — Streamline your procurement to implement cost-effective energy efficiency and renewable energy projects.

Energy procurement — Reduce your energy supply costs by leveraging economies of scale through competitive procurements.
